

- ▶ Fortified with the Pebble Edge Admixture
- ▶ 100% Naturally Round Un-Crushed Quartz
- ▶ Moondust sparkle in each color except Polar White
- ▶ Long Lasting and Durable Quartz Finish
- ▶ Applied by a Wet Edge Certified Installer

Quartz finishes are subject to cosmetic issues that are prevalent in cementitious products. Pigmented quartz colors may increase the possible look of mottling, swirling and trowel marks. The possible uneven appearance is sometimes referred to as a faux finish.

Add **Moon Dust** to any Luna Quartz® pool finish for a glitter effect in your swimming pool. The particles of **Moon Dust** look like individual points of light. Upgrade charges will apply.

You can expect the color of the water to vary depending on a variety of influences such as the position of the sun, whether the day is sunny or overcast, the pool design, the landscaping around the pool and the pool depth. Water color is considered to be subjective and your watercolor will be unique to your pool and its surroundings. Product samples may vary from printed samples. Finish color and consistency may differ due to variations in natural materials, plastering techniques and pool water chemistry. Ask your contractor for a product sample. It is recommended that you view several pools when making a choice on a WetEdge pool finish. Some WetEdge Pool Finishes contain shell blend or moon dust which are crushed abalone and mother of pearl shells. Because of the unique composition of these shells they are not guaranteed from long-term breakdown of loss of color due to pool water chemistry.
